

SAFe RELEASE TRAIN ENGINEER

Course Code: C109

Duration: 3 days

Credits: 24 PDUs

Course Description

SAFe Release Train Engineer is a three-day interactive course where attendees gain an in-depth understanding of the role and responsibilities of a Release Train Engineer (RTE) in the SAFe enterprise. Through experiential learning, examine the RTE role in a Lean-Agile transformation. Learn how to facilitate ART processes and execution, coach leaders, teams, and Scrum Masters in new processes and mindsets. Explore how to prepare, plan, and execute a Program Increment (PI) planning event, the primary enabler of alignment throughout all levels of a SAFe organization.

Participants in the course will have the opportunity to facilitate and enable end-to-end value delivery through Agile Release Trains (ARTs) – and learn how to build a high-performing ART by becoming a servant leader and coach when you become a SAFe® 5 Release Train Engineer (RTE).

Attending this course prepares you to take the RTE5 exam and become a SAFe® Release Train Engineer. Attendees who pass the exam receive a SAFe Release Train Engineer certificate, a one-year certified membership as a SAFe practitioner and a SAFe branding kit with the RTE certification mark.

Target Audience

Individuals who will benefit from this course include Program or Project managers, Agile coaches, SAFe Program Consultants, IT Managers, Consultants, Directors, Program Managers, Product Owners, Solution Train Engineers, Program Managers and those interested in pursuing a SAFe® 5 Release Train Engineer certification. It is highly recommended to hold at least one current SAFe certification and have participated in at least one ART and one PI.

Course Objectives

- Apply Lean-Agile knowledge and tools to execute and release value
- Assist with program and large solution execution
- Foster relentless improvement
- Build a high-performing ART by becoming a servant leader and coach
- Develop an action plan to continue the learning journey
