

## SAFe DevOps

**Course Code: C110E**

**Duration: 2 days**

**Credits: 15 PDUs**

### Course Description

To compete in a disruptive global market, every organization needs to deliver valuable technology solutions at the speed of business. This requires a shared DevOps mindset among all the people needed to define, build, test, deploy, and release software-driven systems—not just the engineers operating a CI/CD pipeline.

The two-day, interactive course helps people across technical, non-technical, and leadership roles work together to optimize their value stream from end to end. Attendees will learn what DevOps is, why it is important to every role, and design a continuous delivery pipeline that is tailored to their business. Attendees work in cross-functional teams to map their current state value stream from concept to cash, identify major bottlenecks to flow, and build an actionable implementation plan that will accelerate the benefits of DevOps in their organization.

### Target Audience

Individuals who will benefit from this course include Scrum Master, Project Manager, Team Leader, Business Analyst, Agile Coach, Consultant, Architect, Engineer, Developer, Director, Manager, Quality Manager, and those interested in pursuing a SAFe® DevOps Certification.

### Course Objectives

- Optimize your organization's value chain with pipeline design
- Develop processes that are aligned with your business continuous transformation
- Improve internal quality and reduce Time-to-Market
- Lead the transformation
- Understand your customers' needs through continuous optimization processes
- Become a DevOps Leader
